

Dear members of the Iowa Medicaid P&T Committee-

I would highly recommend Entresto be added as preferred status on the Iowa Medicaid PDL. I participate in the treatment of heart failure as well as manage the symptoms that accompany the condition. I have become very familiar with Entresto, and have realized it is an optimal treatment for many of our patients. I have had positive experience with Entresto, and for the appropriate patients, they need to be able to access the drug. Having Entresto in a more preferred status, even with a single step edit, will allow more patients the chance to benefit from the superior efficacy it affords. More appropriate patients being allowed access to Entresto will benefit the community at large as well as the entire Great River Health System.

Thank you for your consideration; please reach out to me with any question.
