

Dear Iowa Medicaid and Iowa Drug Utilization Review Committee,

I am writing this letter to you in regards to the medicine Eucrisa. I would ask that you make this medication available to patients without multiple steps/drug failures prior to being able to use this medication. Long term use of topical steroids can have detrimental effects on patients. Eucrisa is a great alternative to this and has the potential of treating many patients and spare them of the potential hazards of long term steroid use. I would kindly ask that you keep this in mind as you review this medication and make your decisions on the process of patients being able to use this medication.

Thank you.
