**Iowa Medicaid Preferred Drug List (PDL)
New Drug Process**

1). Therapeutic classes of drugs already reviewed by the Pharmaceutical and Therapeutics (P&T) Committee

· New drug entities (including new generics), and new drug product dosage forms of existing drug entities) in therapeutic classes already reviewed by the P&T Committee will be identified weekly and immediately be coded as "**Non-preferred-Prior Authorization required**" until presented at the next quarterly scheduled P&T Committee meeting. These prior authorization restrictions will continue through the review process, including while committee recommendations are being made, and lasting until DHS makes a final determination.

2). Therapeutic classes of drugs not yet reviewed by the Pharmaceutical and Therapeutics (P&T) Committee

· New drug entities in therapeutic classes not yet reviewed by the P&T Committee **will remain payable**, in effect preferred by default, until the therapeutic class is discussed. Once this review occurs for the class, the non-preferred default policy will apply to subsequent new drug entries.

3). Exceptions to the Non-preferred default policy for new PDL drugs

There are two major potential exceptions to the non-preferred default policy for new PDL drugs:

A). If a new medication is classified as a priority drug by the FDA, the State may indicate that such a drug is preferred, until the drug is reviewed by the P&T Committee at the nearest scheduled meeting.

B). The State may decide to designate a new drug as "draft preferred" and provide immediate access and increased therapeutic choice to physicians until the drug is reviewed by the P&T Committee at the nearest scheduled meeting if:

- a new drug is therapeutically equivalent or superior to existing preferred or non-preferred choices, and
- is as safe or safer than existing preferred or non-preferred choices, and
- the net cost, adjusted for all rebates, is less expensive than all existing preferred choices.

4). Existing PDL Drugs

· Although the State discourages supplemental rebate offers on existing PDL drugs between annual bidding periods, it may entertain such bids and may accept them if they are determined to represent significant additional savings or if they would replace a delinquent manufacturer's product or a preferred drug pulled from the marketplace or significantly restricted by the FDA. This interim preferred status will remain in effect until the drug is reviewed by the P&T Committee at the next scheduled meeting. Supplemental rebates will only be invoiced for approved drugs under contract. Draft preferred drugs with supplemental rebates will not be invoiced until approved by the Committee and accepted by the State. At that time, the supplemental rebates will be invoiced back to the effective date of the agreement, which is the date the drug began to benefit from preferred status.
