Prior authorization is required for topical acne agents (topical antibiotics and topical retinoids) and topical rosacea agents. Payment for topical acne and topical rosacea agents will be considered under the following conditions:

- 1) Documentation of diagnosis.
2) For the treatment of acne vulgaris, benzoyl peroxide is required for use with a topical antibiotic or topical retinoid.
3) Payment for non-preferred topical acne products will be authorized only for cases in which there is documentation of previous trials and therapy failures with two preferred topical acne agents of a different chemical entity from the requested topical class (topical antibiotic or topical retinoid).
4) Payment for non-preferred topical rosacea products will be authorized only for cases in which there is documentation of a previous trial and therapy failure with a preferred topical rosacea agent.
5) Requests for non-preferred combination products may only be considered after documented trials and therapy failures with two preferred combination products.
6) Requests for topical retinoid products for skin cancer, lamellar ichthyosis, and Darier's disease diagnoses will receive approval with documentation of submitted diagnosis.
7) Trial and therapy failure with a preferred topical antipsoriatic agent will not be required for the preferred tazarotene (Tazorac) product for a psoriasis diagnosis.
8) Duplicate therapy with agents in the same topical class (topical antibiotic or topical retinoid) will not be considered.

The required trials may be overridden when documented evidence is provided that the use of these agents would be medically contraindicated.
