NEW DRUG REVIEW

Proprietary Name: MimyX™ Cream

Common Name: N/A

PDL Category: Topical - Emollients

<u>Comparable Products</u>	<u>Preferred Drug List/ Recommended Drug List Status</u>
Lactic acid (ammonium lactate) lotion 12%	Preferred

Summary

Indications and Usage: Management of and relief of burning and itching skin associated with atopic dermatitis, allergic contact dermatitis, and radiation dermatitis.

Dosage Forms: Cream

Recommended Dosage: Apply to affected skin area three times a day or as needed. Cream should be massaged into the skin. When applied to broken skin, a dressing should be used to cover wound.

Common Adverse Drug Reactions: None reported

Contraindications: Hypersensitivity to any component of the product

Manufacturer: Stiefel Laboratories, Inc.

Analysis: MimyX™ Cream is a topical non-steroidal product that can be used in patients of all ages. The product works by restoring the natural structure and components of the stratum corneum. Several other products that are approved for use of treating atopic dermatitis are preferred on the Preferred Drug List that are more cost effective.
