PDL DRUG LIST (Two Drug Columns)

Highlighted categories denote new changes to the PDL since previous update

Column Header Explanations:

**B, G or O:**

- B = Brand
- G = Generic
- O = OTC

**P, N, R, or NR:**

- P = Preferred
- N = Non-Preferred
- R = Recommended
- NR = Non-Recommended

**COM:**

- |    |  |    |   |
|----|--|----|---|
| 1  | ANTIVERT 50mg - Use two MECLIZINE HCL 25mg instead   | 20 | Preferred only for children 12 years of age and under for the first 60 days of therapy.   |
| 2  | BENZONATATE 200mg - Use two BENZONATATE 100mg instead  | 21 | PROZAC, FLUOXETINE HCL 40mg CAPS - Use two FLUOXETINE HCL 20mg CAPS instead   |
| 3  | BUSPIRONE 30mg - Use 2 BUSPIRONE 15mg tablets  | 22 | RHEUMATREX - Write METHOTREXATE instead   |
| 4  | CLINDAMYCIN HCL 300MG - Use Multiples of CLINDAMYCIN HCL 150mg                               | 23 | ULTRACET - Use Tramadol & Acetaminophen separately  |
| 5  | FLUMIST NASAL VACCINE 200 - Preferred 5 - 49 yo until 3/15/2006.                             | 24 | PA Required >= 21 yo  |
| 6  | FLUOXETINE HCL 20mg TABS - Use FLUOXETINE HCL 20mg CAPS instead                              | 25 | PA Required: > 14 Units/30Days Supply   |

**Iowa Medicaid Preferred Drug List (PDL)  
New Drug Process**

**1). Therapeutic classes of drugs already reviewed by the Pharmaceutical and Therapeutics (P&T) Committee**

· New drug entities (including new generics), and new drug product dosage forms of existing drug entities) in therapeutic classes already reviewed by the P&T Committee will be identified weekly and immediately be coded as "**Non-preferred-Prior Authorization required**" until presented at the next quarterly scheduled P&T Committee meeting. These prior authorization restrictions will continue through the review process, including while committee recommendations are being made, and lasting until DHS makes a final determination.

**2). Therapeutic classes of drugs not yet reviewed by the Pharmaceutical and Therapeutics (P&T) Committee**

New drug entities for conditions without any available PDL choices in therapeutic classes not yet reviewed by the P&T Committee **will remain payable**, in effect preferred by default, until the therapeutic class is discussed. Once this review occurs for the new therapeutic class, the non- preferred default policy will apply to subsequent new drug entries.

**3). Exceptions to the Non-preferred default policy for new PDL drugs**

There are two major potential exceptions to the non-preferred default policy for new PDL drugs:

A). If a new medication is classified as a priority drug by the FDA, the State may indicate that such a drug is preferred, until the drug is reviewed by the P&T Committee at the nearest scheduled meeting.

B). The State may decide to designate a new drug as "draft preferred" and provide immediate access and increased therapeutic choice to physicians until the drug is reviewed by the P&T Committee at the nearest scheduled meeting if:

- a new drug is therapeutically equivalent or superior to existing preferred or non-preferred choices, and
- is as safe or safer than existing preferred or non-preferred choices, and
- the net cost, adjusted for all rebates, is less expensive than all existing preferred choices.

**4). Existing PDL Drugs**

· Although the State discourages supplemental rebate offers on existing PDL drugs between annual bidding periods, it may entertain such bids and may accept them if they are determined to represent significant additional savings or if they would replace a delinquent manufacturer's product or a preferred drug pulled from the marketplace or significantly restricted by the FDA. This interim preferred status will remain in effect until the drug is reviewed by the P&T Committee at the next scheduled meeting. Supplemental rebates will only be invoiced for approved drugs under contract. Draft preferred drugs with supplemental rebates will not be invoiced until approved by the Committee and accepted by the State. At that time, the supplemental rebates will be invoiced back to the effective date of the agreement, which is the date the drug began to benefit from
