PDL Category: Vitamins - Misc.

<u>Comparable Products</u>	<u>Preferred Drug List/ Recommended Drug List Status</u>
Duet® Tab	Preferred
Embrex® 600	Non-Preferred
Precare® Prenatal	Non-Preferred

Summary

Indications and Usage: Improvement of nutritional status of women and reduce constipation throughout pregnancy and the postnatal period

Dosage Forms: Caplets

Recommended Dosage: One caplet once daily

Common Adverse Drug Reactions: Allergic reactions to the folic acid component

Contraindications: Hypersensitivity to any component of of PreCare Premier™

Manufacturer: Ther-Rx Corporation

Analysis: PreCare Premier™ combines a prenatal vitamin caplet with docusate sodium to help prevent constipation. There are several preferred prenatal vitamin products available on the Preferred Drug List that provide adequate supplementation of folic acid, and calcium with or without iron and docusate sodium that are more cost effective.
